Comments on Status

Task I - Item 1. "Submicron Measurement Error Analysis"

Certain materials have properties of considerable interest to measuring engine applications. Further data will be collected and presented in the second technical report under preparation.

March 31, 1965

Comments on Status (Continued)

**Task II - Item 2. "Signal Strength of Broadcast
Radiation of Closed Circuit TV."**

The second technical report outlined the procedure needed to obtain experimental data on the radiation levels and character of representative closed circuit TV equipment. Implementation of the initial test phase is being considered by the customer. No further work will be done on this item until a decision is made regarding the initial test phase.
